The GESIS Spring Seminar (formerly ZA Spring Seminar) offers three consecutive one-week courses in advanced methods of quantitative data analysis for Social Scientists. It has been taking place in Cologne annually every spring for more than 45 years.

Please scroll down to learn more about the many reasons for why you should attend, prerequisites, fees, as well as ECTS credits.

Why attend the GESIS Spring Seminar?

The GESIS Spring Seminar offers high quality training in state of the art techniques in quantitative data analysis taught by foremost experts of the field. The Spring Seminar will

- provide you with in depth knowledge of state of the art quantitative analysis techniques in the social sciences
- enable you to apply state of the art quantitative analysis techniques to your own research projects

- provide you with the opportunity to discuss your research with interested colleagues and foremost experts
- provide you with good networking opportunities, a supportive social environment, and an exciting time in Cologne

Who should attend the GESIS Spring Seminar?

The GESIS Spring Seminar is targeted at advanced graduate or PhD students, post-docs, junior and senior researchers, who are interested in developing and improving their knowledge and skills in state of the art techniques in quantitative data analysis.

Spring Seminar Prerequisites

In addition to the prerequisites mentioned in the syllabi of the courses, all Spring Seminar participants are expected to meet the following general criteria:

- have a sound knowledge of quantitative research methods
- have a good command of English as the Spring Seminar will entirely be held in English.

ECTS Credits

PhD students have the opportunity to receive European Credit Transfer System (ECTS) points thanks to our cooperation with the Cologne Graduate School in Management, Economics and Social Sciences of the University of Cologne. You will be charged an administration fee of EUR 50,00 (3 ECTS points).

Participation Fees

One-week courses rates:
EUR 300 - student / PhD student
EUR 450 - academic / public sector
EUR 900 - commercial.
