

# TwinLife

Genetic and Social Causes of Life Chances  
A genetically informative, longitudinal study of the life  
course and individual development

## ***TwinLife* data available now!**

### **What is *TwinLife*?**

- DFG-funded long-term project
- *Aim*: The study of genetic and social causes of life chances and social inequality
- *Design*: genetically informative, longitudinal, cross-sequential Extended Twin Family Design
- Social inequality conceptualized as a multi-dimensional phenomenon including six inequality domains
- Detailed assessment of a variety of environmental factors

### **How do you get access to the data?**

- First *TwinLife* dataset can be obtained via the GESIS Data Catalogue: <http://dx.doi.org/10.4232/1.12665>
- It contains data from the first face-to-face survey for the first half of the full sample including 2,009 twin families
- Variables and instruments are documented here: [www.paneldata.org](http://www.paneldata.org)
